## CLOSE COOPERATION WITH ATHLETES

Top-class sport has always been an essential part of Komperdell DNA. We are not only suppliers but partners of our athletes. Both our athletes and our customers benefit from our narrow cooperation in developing new products.

# TECHNOLOGY

## DEEPEST TECHNICAL KNOW-HOW

From the first idea until the finished product every single pole is made in the heart of Austria. We use only raw materials according to the latest standards and thanks to years of experience and the greatest technical know-how we are specialist for ultra-light products made of 100% carbon and carbon composite materials.

### THE „THIRD“ SKI

The function of the impact protection equals a third ski. Due to its flattened edges, the impact protection prevents slipping.

© GEPA-PICTURES

### PUNCH COVER

The Worldcup Punch Cover with integrated thumb protection – developed in collaboration with Marcel and Ferdinand Hirscher – provides efficient gliding and stabilizing on snow just like a third ski.

### GRIP & STRAP

The Race Strap, mounted on all carbon and aluminum racing poles, is additionally fastened to the grip with bolt and screw, thus making tearing off the strap nearly impossible.

### SHAFT REINFORCEMENT

Our slalom poles are reinforced with a 20 cm shrink tube on the upper part of the shaft to increase break resistance and to guarantee perfect insulation.

### CARBON

We are leaders in Carbon technology because we are the only producer who has his own development. Top-quality Japanese Carbon fibers in combination with our unique production technique and resins result in top quality Carbon poles with breaking points up to 200 kg.

### BASKETS & TIPS

On our aluminum poles the tungsten/carbide flex tip with mini race basket respectively downhill basket is attached.

On our carbon poles the flex carbide RACE tip with lining disc basket is fixed with an adhesive.

The Komperdell downhill baskets with flex carbide RACE tip have been especially developed for speed races for a perfect slide down the gates.

### BENDINGS

The **Giant Slalom** bending provides best sliding down the gates.

The **Super-G** bending is equipped with an additional wrist bending. This bending provides optimal adjustment to the body.

The **Downhill** bending is an additional bending at the end of the pole. It provides more aerodynamics for downhill races.

# RACING ALUMINUM

**KIRA WEIDLE**  
WM SILVER MEDAL  
WORLD CUP WINNER

**ELENA CURTONI**  
WORLD CHAMPION SUPER-G

© GEPA-PICTURES

## RACING ALUMINUM

LIGHT BUT AS STRONG AS STEEL

For our aluminum racing poles we use the toughest Aluminum alloy: ingredients of zinc and magnesium together with a complex alloying technique result in extreme strength, similar to steel.
